

Market Fresh Covid-19 Updates

Updates:

We will continue to update this document with any and all changes of COVID-19 cases and updates as they come clear to us at Market Fresh. We will be transparent with our community as soon as we have been notified of cases of COVID-19 in our store. Out of respect for the individual, their confidentiality and information will never be released to the community. In such a case of concern, Public Health will contact you if they believe you have come in contact with the said individual.

We will always notify and follow the guidance of Public Health to support our team who are impacted by COVID-19.

- We will continue to always do everything we can to support our team and ensure their safety.
- We will continue to communicate with our customers with store signage and verbal communication of our standardized cleaning protocols and how to practice safe COVID standards.
- We will continue to provide sanitizer and thorough cleanings every 30 minutes in our departments.
- We will continue to wear face masks + shields and perform daily assessments on all staff, including temperature checks daily.
- We will continue to practice a 6 feet distance from one another and encourage customers to do the same. Additionally, we are limiting the number of customers in our store to achieve social distancing protocols.

COVID-19 Cases In Our Store:

Reporting Date: **Last Day Worked:** **Details:**

Reporting Date:	Last Day Worked:	Details:

***Please note that all cases will be removed from the tracker after 14 days from the initial reporting date unless new information is received.**

Thank you for your cooperation, patience and ongoing support.
